moobila Mobile Applications

- Moobila is an iPhone application development company with an expertise in Video Streaming.
- Moobila creates custom iPhone applications for individuals, businesses, or groups looking to provide customers with iPhone applications developed to their specification.
- Moobila also provides services to market applications through promotional videos, news articles, and introductions to reviewers and other companies.

We Are Experienced Developers

Moobila Products

Linkefy: One touch solution to a complete 'add friend' request!

iPicolo: Upload photos in just one click!

iPicEd: Edit your pictures right on your iPhone!

For more apps, visit www.moobila.com

Moobila developers have experience in developing and optimizing multimedia and computation intensive applications for embedded and mobile platforms while integrating its design with other web services platforms such as Google's API's.

Moobila developers work with Xcode/iPhone SDK , PHP, MySQL, Ruby on Rails, Cocoa Framework, and objective C. Developers at Moobila also have a strong track record in converting web applications onto the mobile format; especially into the iPhone format.

So if you are looking to setup a team to build applications for your company, or just looking for someone to help market your applications in the U.S., Moobila is here to help.
